

Title:

Screening Tests Used for Preschool Aged Children

Content Area:

School Psychology

Grade Level:

Preschool

Objective Statement

Describe the overall objective, identifying the specific outcome that will be achieved by the end of the interval of service. The objective statement should be specific enough to clarify the focus of the Special Assignment Objective.

I will become more familiar with the instruments used to screen preschool aged children in Providence (i.e. the ESI3 and the ASQ:SE-2).

Rationale

Describe the (date-driven) explanation for the focus of the Special Assignment Objective and indicate if it is aligned with a school or district priority.

It is important to be familiar with the screening instruments which are used to determine whether a child should be referred for further evaluations.

Target(s)

Describe what you expect to achieve at the end of the interval of service. If baseline data/information suggests meaningful differences, targets could be tiered to be both rigorous and attainable.

I will read the manuals for the: Early Screening Inventory (ESI3) and the ASQ:SE-2, observe them being administered at least 3 times , then administer each of these tests at least once while I am observed by another evaluator.

Rationale for Target(s)

Explain how the target(s) was determined including data source(s) and why the target(s) is appropriate, rigorous and attainable.

I am currently familiar with administering and scoring psychological tests and I believe that the activities outlined above with will familiarize me with the screening instruments used by my district. Also, administering these instruments myself will familiarize me with the way that they are scored.
